

- ✔ Excellent Reporting
- ✔ Integrated with SMS

## the JBS ATTENDANCE SOFTWARE

**MANAGE UNLIMITED DEVICES** - Manage any number of fingerprint devices you have in your institution. This allows you to have different registers operational through the system at the same time, for instance Check In and Check Out for staff, daily class registers for students and dining hall tracking.

**SEND SMS NOTIFICATIONS** - Whenever a user checks in or out, or when a user is absent upon check-in time lapse, sms notification is sent. For example, if the user is a student, the parent gets a notification SMS in either of the above cases.

**USER-DEFINED REPORTS** - This is a solution to all attendance questions about the users in the institution e.g for a school population, Reports for students present or absent, those who were late, attendance trend for staff over a week, month e.t.c

### IMPORT OR EXPORT DATA

- Import data into the system for easy start off...
- Export data for backup and integrations with other systems.

### CUSTOMIZE SMS

- Define your own templates for the SMS messages to be sent to users / parents when a user clocks on the fingerprint device.

### LINK DEVICES AND SMS ACCOUNT

- Add a device to the system easily
- Link your system to JBS SMS for sending notification SMS messages.
